INTRODUCTION

This directory has been compiled **by** ITDG in response to the growing number of requests for the names and addresses of organizations actively involved in the promotion, development and application of appropriate technologies around the world.

There are in existence a **number** of directories compiled **by** various international organizations. (These include: UNEP, Institutions and Individuals Active in Environmentally Sound and Appropriate Technologies (UNEP, Nairobi, 1978; Jequier N, Appropriate Technology Directory) (Development Centre of the OECD, Paris, 1979); **Commonwealth Secretariat, Rural Technology in the Commonwealth: A Directory of Organizations** (CS Food Production and Rural Development Division, London, 1980).) These are of limited value in responding to such requests, in part because they are quickly out of date and restrictive in their coverage, and in part because they are too expensive to provide on a widespread basis.

This directory is published in such a way as to provide up-to-date comprehensive information which is freely available to all those requesting it.

A large proportion of the organizations listed in this directory were referred to in **ITDG's** recent review of institutions (**Whitcombe R. and Carr M., Appropriate Technology institutions: A Review; Occasional Paper No. 7 ITDG, London, 198-f** these organizations have been included because of their known role in supporting, either directly or indirectly, the development and application of appropriate technologies. Since researching this **paper**, other AT institutions of consequence have become known, and these are also included in the

directory.

Given the speed at which new AT institutions are established (by one account, this is at a rate of one new institution somewhere in the world **every** week), there will clearly be a need to update this directory. An annual revision is planned. Corrections, information on omissions, and other suggestions from readers are **welcome**.

The directory is divided into four major sections

- A. Country
- B. Regional
- C. International Institutions and Networks
- D. International Support Agencies

In the 'Country' section, most of the listed organizations are specialized AT institutions, with major interest and involvement in one or more functional activities. Most are concerned with their own country (or part of it), although some, particularly those located in developed countries, have interest and involvement in other countries. To give some indication of their scope and purpose, the organizations listed in the 'Country' section have been coded according to their geographical and major functional coverage (minor functional activities being excluded). The codes are:

- Loc. local catchment: does not cover more than immediate surroundings
- Nat. national catchment: has interest and involvement in the whole country
- Int. international catchment: has interest and involvement outside the country of location
- I information/documentation/networking
- R research and development, technology development and adaptation

T training, extension and education
C coordination, policy advisory
F funding

A few organizations are not coded, because of inadequate information.

In the other three sections, the institutions listed are not coded according to catchment area or function, since in most cases this is self-evident.

11. **Stephen Biggs and Ruth Grosvenor-Alsop**, *Developing Technologies for the Rural Poor*.
12. **Marilyn Carr**, *Intermediate Technology in Papua New Guinea: A Review of SPATF*.

Intermediate Technology publications are available from the I T Bookshop at 9 King Street, Covent Garden, London WC2E 8HN, UK, or by mail order from the same address.

The Intermediate Technology Development Group was founded in 1965 by the late Dr. E. F. Schumacher. ITDG, an independent charity, gathers and disseminates information, and advises on the choice of technologies appropriate for developing countries. In addition, the Group is also involved in an expanding programme of work on technology choice for Britain.
